

NEGLECTING YOUR HEALTH HURTS THE LIVER.

VIRAL HEPATITIS causes almost **1.5 MILLION DEATHS** a year worldwide, whether from acute infection, cancer, or cirrhosis.

In Brazil, types C, B, and A are the most common, respectively. They almost never have symptoms. They are almost always confused with other diseases.

Visit dorconsultoria.com.br/doi-nofigado to learn how to protect your liver before the impact is unrecoverable.
