Condom, 23

changes a whole life

DOR
consultoria

If the subject is prevention, no more relying on intuition! In ten years (2009 - 2019), condom use among young people dropped 13,5%. Not surprisingly, the incidence of sexually transmitted infections (STIs) has skyrocketed. Unprotected pleasure can turn into health damage. When it's time for sex, use a condom. And in life, always keep your exams up to date.
