

THERE'S
NO CURE
NO CURE
CARE

Being diagnosed with a chronic disease, such as **fibromyalgia, lupus or Alzheimer's**, can be devastating. And even with proper treatment and a support network, you have to face broken branches, droughts and downpours to wait for the new foliage.

In this **Purple February**, the month to raise awareness about these diseases, we highlight the importance of early diagnosis, constant attention and the resilience of those who live with them. After all, even without a cure, there is care.
